

GALAXY BLACK

STONE TYPE

Granite

FINISH

Polished

ORIGIN

Andhra Pradesh, India

SIZES

12"x12"x3/8"

3/4" (2cm slab)

1-1/4" (3cm slab)

GEOLOGICAL ERA

Proterozoic

(544-2500 million years ago)

RECOMMENDED USES

Commercial & Residential

Interior & Exterior

Floor & Wall

Backsplashes

Countertops

Fireplaces

Tub Surrounds & Showers

Vanities

Galaxy Black is quarried from a boulder quarry located near the town of Markapur, in the state of Andhra Pradesh, India. The size and color of each block is fairly consistent between shipments. Arizona Tile focuses its purchases on the slabs with medium-sized gold flecks. It is possible to have some slight veining in this color, or consolidation of the gold flecks. Because it is such a dense stone, and there are minimal micro fissures and pitting, no resin is applied to the surface. As a natural stone product it is recommended that it be sealed to extend its longevity.

This granite is also known as Amethyst Black, Black Galaxy, Black Star Galaxy, or Midnight Magic.

NSF indicates this product conforms to the requirements of NSF/ANSI Standard 51, thereby meeting the health and sanitation requirements for materials used in areas of food preparation.
